EDUCATION

**Webster University in
Tashkent** 2023 – 2026

Bachelor's Degree in Computer
Science (not completed)

Relevant coursework:

- Computer Languages
- Object-Oriented Programming
- System analysis & Design
- Network Principles
- Social Engineering

SKILLS

- **Languages:** Python, JavaScript, SQL, PHP
- **Backend:** Django, FastAPI, Laravel, REST APIs
- **Frontend:** Vue.js, HTML/CSS
- **Data & ML:** PostgreSQL, Pandas, NumPy, PyTorch, TensorFlow
- **Tools:** Git, Postman, Cursor

LANGUAGE

- **Uzbek** – Native
- **English** – B2
- **German** – B1 (currently studying) – Goethe B2 expected (12/2026)
- **Russian** – B2

ABOUT ME

Aspiring Software Engineer with practical experience in backend development, artificial intelligence, and product development. Through an internship, startup projects, and hackathons, I have gained hands-on experience building software with Python, Django, FastAPI, Vue.js, PostgreSQL, and machine learning technologies.

I am seeking an Ausbildung as Fachinformatiker für Anwendungsentwicklung because I want to strengthen my software engineering fundamentals through structured learning and practical experience. I am currently studying German and expect to obtain the Goethe-Zertifikat B2 by December 2026.

WORK EXPERIENCE

Software Engineering Trainee

Uzinfocom – 10/2024 – 08/2025

Responsibilities:

- Developed backend applications using Python.
- Worked with Django and FastAPI.
- Built frontend components using Vue.js.
- Designed and queried PostgreSQL databases.
- Participated in debugging, testing, and feature implementation.
- Collaborated with developers in an Agile environment.
- Contributed to the development of AI-based software solutions.

Tech Stack:

Python • Django • FastAPI • PostgreSQL • Vue.js • Git

Project:

“Uzbek Sign Language Recognition”

Description:

Contributed to the development of an AI model for Uzbek Sign Language recognition to improve communication between hearing and hearing-impaired people.

Responsibilities:

- Data preprocessing
- Model training
- Performance evaluation
- Model optimization

Libraries:

- TensorFlow
- PyTorch
- NumPy
- Pandas
- Matplotlib

STARTUP EXPERIENCE

Founder & Software Engineer

Deutschlify

Description:

AI-powered platform helping learners prepare for Goethe, TELC, TestDaF, and DSH examinations through realistic exam simulations and personalized practice.

- Designed the system architecture
- Built the backend using FastAPI
- Integrated AI-powered exam simulations
- Developed features supporting Goethe, TELC, TestDaF and DSH preparation
- Applied AI-assisted development workflows while validating implementation independently

Technologies:

- Python
- FastAPI
- OpenAI APIs
- Cursor
- Codex

Responsibilities:

- Product conception
- Backend development
- AI integration
- Prompt engineering
- System architecture
- User experience design

Co-Founder & Technical Lead

Converza

Description:

AI-powered marketing platform automating repetitive agency workflows through autonomous AI agents.

Responsibilities:

- Designed the complete backend architecture
- Built the core platform
- Designed AI workflows
- Integrated LLM-based automation
- Product development

HACKATHONS

Hackathon Participant

Participated in multiple software development hackathons organized by technology companies.

Focused on:

- Rapid software development
- Team collaboration
- Problem solving
- Pitching ideas
- Building MVPs under time constraints

ADDITIONAL EDUCATION

Alif Academy

Backend Development – PHP (Laravel)

July 2026 – November 2026 (Expected)

Topics:

- Laravel
- REST APIs
- Authentication
- MVC
- Database Design

INTERESTS

Outdoor Activities & Hiking

- I enjoy hiking and spending time in nature. It helps me recharge, stay active, and approach challenges with a clear mind.

Fitness & Strength Training

- Regular weight training has taught me discipline, consistency, and the value of long-term progress through small daily improvements.

Building Products & Solving Problems

- I enjoy identifying real-world problems and developing practical software solutions. Exploring new ideas and turning them into working products is one of my biggest motivations.

Content Creation & Documentation

- I enjoy documenting my learning journey through video blogs and written notes. Sharing knowledge helps me reflect on my progress and continuously improve.

Language Learning

- I enjoy learning foreign languages and discovering new cultures. My current focus is German, as I am preparing to build my long-term career and life in Germany.

CORE COMPETENCIES

- Backend Development
- AI-assisted Development
- REST APIs
- Problem Solving
- Team Collaboration
- Software Architecture
- Continuous Learning
